UNIVERSITI UTARA MALAYSIA

2011

THE FOUR BASIC PILLARS OF HAJJ'S MOBILE SYSTEM

**A project submitted to Dean of Research and Postgraduate Studies Office in partial
Fulfillment of the requirement for the degree
Master of Science (Information Technology)
Universiti Utara Malaysia**

**By
Sakina M.A Makhzuom (803034)**

KOLEJ SASTERA DAN SAINS
(College of Arts and Sciences)
Universiti Utara Malaysia

PERAKUAN KERJA KERTAS PROJEK
(Certificate of Project Paper)

Saya, yang bertandatangan, memperakukan bahawa
(I, the undersigned, certifies that)

SAKINA M.A MAKHZOOM

(803034)

calon untuk Ijazah
(candidate for the degree of) **MSc. (Information Technology)**

telah mengemukakan kertas projek yang bertajuk
(has presented his/her project of the following title)

THE FOUR BASIC PILLARS OF HAJJ'S MOBILE SYSTEM

seperti yang tercatat di muka surat tajuk dan kulit kertas projek
(as it appears on the title page and front cover of project)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan
dan meliputi bidang ilmu dengan memuaskan.
(that this project is in acceptable form and content, and that a satisfactory
knowledge of the field is covered by the project).

PERMISSION TO USE

In presenting this project in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this project in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence by the Dean of Postgraduate and Research. It is understood that any copying or publication or use of this project or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my project.

Requests for permission to copy or to make other use of materials in this project, in whole or in part, should be addressed to

Dean of Research and Postgraduate Studies
College of Arts and Sciences
Universiti Utara Malaysia
06010 UUM Sintok
Kedah Darul Aman
Malaysia

ABSTRACT

The first goal of this research is involve to design and develop a mobile application making the performing of Hajj easy and without any mistake. This quantitative study was adopted in this study .The User awareness on the ease of use and the usability of FBPHMS prototype was estimated using a testing session followed by a questionnaire. It was conducted on 40 respondents. The analysis of the results indicated that the usability of the system was very high on both aspects namely, usefulness and ease of use.

ABSTRAK

Tujuan utama kajian ini adalah untuk merancang dan mengembangkan p16nggunaan kemudahan telekomunikasi untuk menunaikan haji dengan cara yang lebih mudah tanpa sebarang masalah. Penelitian kuantitatif ini digunakan dalam kajian ini. Kesedaran pengguna dalam menggunakan kemudahan dari prototaip FBPHMS akan diuji dengan kaedah soal selidik. Kajian ini melibatkan 40 responden. Analisis keputusan kertas projek ini menunjukkan bahawa kepenggunaan sistem ini adalah tinggi untuk kedua-dua aspek iaitu melibatkan kegunaan dan mudah untuk digunakan.

ACKNOWLEDGMENT

In the name of Allah the Most Gracious and The Most Merciful

All praise and due are to Allah and peace and blessings are upon His Messenger

Praise is to Allah the most exalted whose mercy and blessing have enabled me to complete this proposal. I owe my deepest gratitude to those who have helped me through the process of completing this thesis. It is a pleasure to thank those who made this thesis possible.

I am heartily thankful to my supervisor madam: NUR FADZIANA FAISAL MOHAMED whose encouragement, guidance and support from the initial to the final level enabled me to develop an understanding of the subject. I would like to express my most sincere appreciation to my husband EL.SHEBANI MAKHZOOM for his supporting and guiding me to completing my thesis. Special thanks also go to all of the lecturers at University Utara Malaysia, College of Arts and Sciences, department of Information Technology, especially, Coordinator of Postgraduate Studies, (DR. NOR LAILY HASHIM) for their supporting. Lastly, my warmest thanks, appreciation, and gratitude are due to my dear parents for their support, patience and prayers.

CHAPTER ONE

INTRODUCTION

This chapter introduces the background of the study. All of the details about the four Basic Pillars of Hajj's Mobile System, and This chapter also will answers to the research questions and explains why this study, and the main elements which involved in the study are: problem statement, research questions, objectives of study, research Scope, research significance. Finally, summary of this chapter.

1.0 Background

According to Mohamed et al., (2009), hajj is the fifth commandment in Islamic religion that is compulsory to all able Muslims to perform at least once in their whole life. Also, refers to any person who leaves his house and goes toward Macca for performing Hajj in the month of Dhul al-Hijjah ¹.The preferment of its rules in the right way is most required to make it perfect and acceptable from Allah (S.W.T), there are four basic pillars of Hajj as follow:

¹ Dhul al-Hijjah: is the twelfth and final month in the Islamic Calendar. It is a very sacred month. It is in this month in which the Hajj Pilgrimage takes place.
